PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience designing and developing scalable enterprise applications using .NET technologies. Experienced in microservices architecture, RESTful APIs, cloud deployment, database optimization, production support, and enterprise software development. Proven ability to deliver high-performance solutions, manage production releases, and solve complex business and technical challenges.

TECHNICAL SKILLS

Programming Languages: C#, JavaScript, TypeScript, SQL

Frameworks & Libraries: ASP.NET Core, Web API, Angular, Dapper, Entity Framework Core, Semantic Kernel

Backend Development: RESTful APIs, Microservices Architecture, Clean Architecture

Database Management: PostgreSQL, Redis

Message Brokering & Cloud: RabbitMQ, Docker, Azure

DevOps & Version Control: Git, GitHub, GitLab, Bitbucket, CI/CD Pipelines

Testing: xUnit

Design & Architecture: SOLID Principles, Design Patterns, Event-Driven Architecture

WORK EXPERIENCE

Software Engineer — Foodi Express Ltd | Dhaka, Bangladesh

April 2026 – Present

Project: Foodi – Food Delivery Platform

- Collaborate with stakeholders to analyze business requirements and convert them into effective technical solutions.
- Manage production deployments and ensure successful releases with minimal operational impact.
- Monitor application logs and investigate production issues to maintain platform stability.
- Design and optimize reporting solutions that support high-volume data processing without affecting peak-hour performance.
- Perform root cause analysis and implement continuous improvements to enhance system reliability and user experience.

Software Engineer — Technonext Software Ltd. | Dhaka, Bangladesh

March 2023 – March 2026

Project: foodibd.com – Food Delivery Platform

- Ensured security authentication and authorization across application services.
- Designed and developed scalable microservices and RESTful APIs following Clean Architecture principles.
- Implemented event-driven communication and caching strategies to improve application performance.
- Collaborated with cross-functional teams to deliver new features and maintain service reliability.

Junior Software Engineer — Masco Group | Dhaka, Bangladesh

January 2022 – February 2023

Project: ERP & Garment Management System

- Developed and maintained ERP modules and business management applications.
- Built dynamic reports and dashboards to support operational and management decision-making.

- Integrated third-party services and APIs to extend platform capabilities.
- Collaborated with stakeholders to gather requirements and deliver business solutions.
- Participated in code reviews, testing activities, and continuous product improvements.

Assistant Software Engineer — Lumen Information Technology Ltd. | Dhaka, Bangladesh

October 2020 – December 2021

Project: Education Management System

- Developed RESTful APIs for student, attendance, result, and fee management modules.
- Built and maintained user-friendly interfaces integrated with backend services.
- Developed reporting features to support academic and administrative operations.
- Assisted in system testing and quality assurance activities.
- Collaborated with team members to deliver reliable and scalable software solutions.

PROJECTS

Pronunciation Assessment System

- Developed AI-powered pronunciation assessment using Azure Speech Services.
- Implemented phoneme-level pronunciation analysis and scoring.
- Designed scalable backend APIs using .NET Core and Clean Architecture.
- Built learning-focused assessment workflows.

KEY ACHIEVEMENTS

- Successfully delivered scalable enterprise and consumer-facing software solutions across food delivery, ERP, and education domains.
- Resolved critical production issues and database challenges while maintaining business continuity.
- Improved system performance through optimization, caching strategies, and efficient backend design.
- Managed production deployments and releases for high-availability applications.
- Contributed to the successful delivery of multiple large-scale business applications used in production environments.

EDUCATION

Bachelor of Science (BSc) in Computer Science & Engineering

Pabna University of Science and Technology (PUST)

Passing Year: 2019

Higher Secondary Certificate (HSC)

Netrakona Govt. College

Passing Year: 2013 | GPA: 4.00/5.00

Secondary School Certificate (SSC)

Dutt High School

Passing Year: 2011 | GPA: 3.56/5.00
